INTRODUCTION

Vallair plays an active role in commercial aircraft purchase, disassembly and spares re-marketing. We are recognised for our engineering expertise and our excellent customer service. Our services and solutions are divided into four sections:

● TRADING & LEASING

As an active member of the International Society of Transport Aircraft Trading (ISTAT), we provide a full range of aerospace trading and leasing solutions, providing the flexibility you need to stay competitive.

- Full aerospace life cycle management and operational consultancy
- Airframe trading and leasing solutions
- Power plant and major dynamic component trading and leasing solutions

We are a founding member of the Aircraft Fleet Recycling Association (AFRA), focused upon aircraft sustainability by supporting the safe and environmental pro-active management of the world's aging aircraft fleet.

- Full aircraft disassembly and recycling
- Return of power plants and parts to aircraft and inventories with tracability and accreditation
- Recycling of materials back into commercial manufacturing supporting the circular economy

● DISASSEMBLY

REPAIR & MAINTENANCE ●

We specialise in returning value to your assets at end of service by providing fast and efficient overhaul and repair of airframe, power plants and dynamic components.

- State of the art composite repair facilities for the repair and overhaul of nacelles, thrust reversers and flying control surfaces
- Highly skilled sheet metal work facilities
- Experienced power plant management

CARGO CONVERSION ●

We offer full passenger to cargo (P2C) conversions through our highly experienced freighter conversion partners, to address the growing global requirement for freight and cargo application.

- Extended revenue generation to airframes at end of passenger service
- Flexible options tailored to suit your commercial and operational requirements
- Programmes completed on time to budget to exacting specifications
